Summary

MERN Stack Developer with hands-on experience building full-stack applications using React.js, Node.js, Express.js, TypeScript, and MongoDB, supported by 5+ years of professional IT experience in technical support and quality assurance. Experienced in REST APIs, authentication and authorization, database design, validation, state management, business workflows, debugging, and production-oriented full-stack development. Strong foundation in troubleshooting, root-cause analysis, and translating business requirements into reliable technical solutions.

Skills

</> Languages JavaScript, TypeScript, HTML5, CSS3	📱 Frontend React.js, React Router, Redux Toolkit, RTK Query, Context API, Vite, Chakra UI	📡 Backend Node.js, Express.js, REST APIs, MCS Architecture	🗄 Database MongoDB, Mongoose, MongoDB Aggregation
🔒 Authentication & Security JWT, HTTP-only Cookies, bcrypt, Role-Based Authorization, Input Validation, CORS	🔗 Tools & APIs: Axios, Postman, Thunder Client, Git, GitHub	🔧 Development Practices: API Design, Database Design, Business Rules, Error Handling, Debugging, Testing, AI-Assisted Development	🚀 Deployment Render, Netlify

Projects

TechNest — Full-Stack E-commerce & Order Management Platform

React.js · TypeScript · Node.js · Express.js · MongoDB

In Progress — 75% complete

- Designed requirements, business rules, database structure, API architecture, and Customer/Admin workflows.
- Built a TypeScript backend using Express.js, Mongoose, and MongoDB with Route → Middleware → Validation → Controller → Service architecture.
- Implemented hierarchical categories, JWT authentication with HTTP-only cookies, role-based authorization, and product, cart, checkout, payment, stock, and order workflows.
- Built the React frontend using Redux Toolkit, RTK Query, React Router, and Chakra UI; applied AI-assisted development for implementation while independently handling architecture, validation, debugging, testing, and documentation.

Customer Support Ticket Management System

React.js · JavaScript · Node.js · Express.js · MongoDB

Completed & Deployed

- Developed a full-stack ticket management application with Customer, Agent, and Admin workflows using REST APIs and MongoDB.
- Implemented JWT authentication, protected routes, role-based authorization, ownership checks, ticket workflows, search, filtering, sorting, and pagination.
- Designed Mongoose relationships using references and populate with MongoDB aggregation pipelines for dashboard analytics.
- Added request validation, centralized error handling, reusable React components, Context API, Axios integration, and production deployment.

 Experience

Movate

Associate — Quality Assurance

Chennai, India
February 2024 - August 2025

- Audited technical support calls, emails, tickets, and cases for troubleshooting accuracy, process adherence, documentation, compliance, and customer handling.
- Performed root-cause analysis on recurring quality issues and provided coaching and corrective feedback to improve support quality.
- Prepared quality reports and collaborated with Operations, Management, Clients, and Training teams on performance and defect trends.

Tech Mahindra

Sr. Associate — Quality

Chennai, India
September 2021 - February 2024

- Audited technical support interactions and tickets, identifying troubleshooting, process, documentation, and compliance issues.
- Conducted calibration, coaching, onboarding, and performance reviews with Operations, Clients, and Training teams.
- Built an Excel performance dashboard and applied Lean Six Sigma/root-cause analysis to identify operational issues and support improvements in quality, defect reduction, CSAT, and compliance.

Technical Support Specialist

February 2020 - August 2021

- Provided technical support for telecom, broadband, router, connectivity, mobile, SIM, voice, and roaming issues through phone, chat, and email.
- Diagnosed and documented technical issues using structured troubleshooting procedures, Salesforce, and internal support systems; recognized with Associate of the Month and Bravo Award.
